

TABLE OF CONTENTS

Introduction	vii
Staff Photo	ix
Staff	xi
Staff News	xiii
Acknowledgments	xiv
PHYSICS, BIOPHYSICS, AND MODELING	
Rutherford, the Curies, and Radon	3
David J. Brenner	
The Potential Impact of the Bystander Effect on Radiation Risks on a Mars Mission	5
David J Brenner and Carl D. Elliston	
A Quantitative Model of the Bystander Effect in Radiation Oncogenesis	7
David J. Brenner, J.B. Little (Department of Cancer Cell Biology, Harvard School of Public Health, Boston, MA), and R.K. Sachs (Department of Mathematics, University of California, Berkeley)	
MICROBEAM STUDIES	
The Bystander Effect in Radiation Oncogenesis: Oncogenic Transformation Can be Initiated in the Unirradiated Neighbors of Irradiated Cells	11
Satin Sawant, Gerhard Randers-Pehrson, Charles R. Geard, David J. Brenner, and Eric J. Hall	
Adaptive Response and The Bystander Effect	15
Satin G. Sawant, Gerhard Randers-Pehrson, and Eric J. Hall, in collaboration with Noelle F. Metting (Pacific Northwest National Laboratory)	
Studies of a Bystander Mutagenic Effect in Mammalian Cells Using a Charged-Particle Microbeam	19
Hongning Zhou, Gerhard Randers-Pehrson, Charles A. Waldren (Department of Radiological Health Sciences, Colorado State University, Ft. Collins, CO), James E. Trosko (Department of	

Pediatrics, Michigan University Medical School, East Lansing, MI),
Eric J. Hall, and Tom K. Hei

Mutagenicity of Cytoplasmic Irradiation in Mammalian Cells: Role of Peroxynitrite Anions	25
An Xu, Gerhard Randers-Pehrson, and Tom K. Hei	
Investigation of the Bystander Effect in Known Irradiated and Non-Irradiated Normal Human Fibroblasts	29
Brian Ponnaiya, Gloria Jenkins-Baker, Gerhard Randers-Pehrson, and Charles R. Geard	
Bystander Cell Responses in Normal Human Fibroblasts as a Function of Hit-Cell Fraction	33
Charles R. Geard, Brian Ponnaiya, Gloria Jenkins-Baker, and Gerhard Randers-Pehrson	
Cytoplasmic Irradiation of Normal Human Fibroblasts	35
Charles R. Geard, Brian Ponnaiya, Gloria Jenkins-Baker, and Gerhard Randers-Pehrson	
Microbeam Irradiation of Intercellular Medium Between Normal Human Fibroblasts	37
Charles R. Geard, Brian Ponnaiya, Gloria Jenkins-Baker, and Gerhard Randers-Pehrson	
p53 Modulation and Microbeam Responses: Studies with MCF-7 and MCF-7/E6 Cells	39
Charles R. Geard, Gloria Jenkins-Baker, Gerhard Randers-Pehrson, and David Boothman (Case Western Reserve University)	
Microbeam Studies with Lifespan-Extended Human Retinal Pigmented Epithelial Cells	41
Charles R. Geard, Brian Ponnaiya, Gloria Jenkins-Baker, and Gerhard Randers-Pehrson	
Single-Cell RT-PCR for Early-Response Genes	43
Brian Ponnaiya, Gloria Jenkins-Baker, and Charles R. Geard	
SCGE Detection of DNA Damage in Human Nuclei Induced by Microbeam Irradiation Using Alpha Particles	45
Adayabalam S. Balajee, Brian Ponnaiya, M. Prakash Hande, T.S. Kumaravel and Althaf Lohani (Laboratory of Molecular Genetics, National Institutes of Health, Gerontology Research Center,	

Baltimore, MD), Gerhard Randers-Pehrson, Stephen A. Marino, and Charles R. Geard

CELLULAR STUDIES

Routine Mammographic Screening and Breast Cancer Induction	51
Satin G. Sawant, Stephen A. Marino, Charles R. Geard, and David J. Brenner, in collaboration with Zugen Fu (SUNY/ Stonybrook)	
Malignant Transformation of Human Bronchial Epithelial Cells with Tobacco-Specific Nitrosamine, 4-Methylnitrosamine-1-3-Pyridyl-1-Butanone (NNK)	55
Hongning Zhou and Tom K. Hei	
Induction and Mutant-Spectrum Analysis of CD59 Mutations in Human Hamster Hybrid Cells by Crocidolite Asbestos and Hydrogen Peroxide: Implications for Mechanisms of Fiber Mutagenesis	57
An Xu and Tom K. Hei	
Effects of Irradiated Medium on Chromatid Aberrations and Mutagenesis in Mammalian Cells: Studies Using Double-Mylar Dishes	61
Masao Suzuki, Hongning Zhou, Charles R. Geard, and Tom K. Hei	
Mutagenicity of Cadmium in Mammalian Cells	65
Fei Sung, Stephanie Stern (Intern), and Tom K. Hei	
Quantitative Measurement of Superoxides and Hydroxyl Radicals Generated in Arsenite-Treated Cells Using ESR Spectroscopy	67
Su-Xian Liu, Istvan Lippai (Department of Physiology and Biophysics, Albert Einstein College of Medicine, Bronx, NY), Mohammed Athar (Department of Dermatology, College of Physicians & Surgeons, Columbia University), and Tom K. Hei	
Extension of Lifespan in Primary Human Bronchial Epithelial Cells by Expressing Telomerase	69
Chang Q. Piao, Yong L. Zhao, and Tom K. Hei	
Markers in Progression of Human Breast Epithelial Cells Transformed by Estrogens and High-LET Radiation	71
Gloria M. Calaf and Tom K. Hei	

Neoplastic Progression of Benzo(a)pyrene-Treated Breast Epithelial Cells	75
Gloria M. Calaf and Tom K. Hei	

Karyotype Analysis in Tumorigenic Human Bronchial Epithelial Cells Transformed by Crysolite Asbestos Using Chemically Induced PCC Technique	79
Masao Suzuki, Chang Q. Piao, and Tom K. Hei	

High-Energy Ions and Genomic Instability	85
Chang Q. Piao, Tom K. Hei, and Eric J. Hall	

CYTOGENETIC STUDIES

Induction and Recovery of Cytotoxic and Chromatic Damage in Primary Human Bronchial Epithelial Cells Irradiated with ⁵⁶Fe Ions	89
Masao Suzuki, Chang-Qing Piao, and Tom K. Hei	

Conservation of Chromosome-Specific Telomere Length in Mammalian Cells	93
Andrei Tchirkov and Elizabeth Chavez (Terry Fox Laboratory for Hematology/Oncology, BC Cancer Research Center, Vancouver Canada), M. Prakash Hanke, and Peter Lansdorp (TFL)	

Chromosome Aberrations Induced by a Particles and Soft X-Rays in Human Primary Fibroblasts	97
M. Prakash Hande, Satin G. Sawant, Brian Ponnaiya, Sonu Dhar, Stephen A. Marino, Adayabalam S. Balajee, Charles R. Geard, and David J. Brenner	

Use of Chromosome-Arm-Specific Probes in the Detection of Radiation-Induced Inter-Arm Exchanges	101
M. Prakash Hande, Sonu Dhar, Adayabalam S. Balajee, Charles R. Geard, and David J. Brenner	

MOLECULAR STUDIES

<i>S. pombe rad9</i> and its Human Homologue Have a BH3-Like Domain and Can Promote Apoptosis in Human	107
Howard B. Lieberman, Kevin M. Hopkins, and Haiying Hang, in collaboration with Hong-Gang Wang and Kiyoshi Komatsu (H. Lee Moffitt Cancer Center and Research Institute, University of South Florida)	

Construction and Analyses of <i>Mrad9</i> Knockout Cells and Mice	109
Howard B. Lieberman, Kevin M. Hopkins, and Haiying Hang, in collaboration with Wojtek Auerbach and Alexandra L. Joyner (The Skirball Institute, New York University)	
Effect of Human <i>HRAD9</i> Overexpression on Cell Survival, Growth, and Checkpoint Control	111
Haiying Hang and Howard B. Lieberman	
ATM Gene Product is Not Required for DNA-Damage-Dependent Redistribution of PCNA Complex in Human Cells	113
Adayabalam S. Balajee, M. Prakash Hande, and Charles R. Geard	
A Common Target Gene for p53 and Rb Functions in Apoptosis	117
Yuxin Yin, Yan Jin (Department of Biochemistry and Molecular Biophysics, College of Physicians & Surgeons, Columbia University), and Eric J. Hall	
The Catalytic Subunit of Telomerase is Expressed in Developing Brain Neurons and Serves a Cell-Survival-Promoting Function	119
Weiming Fu, Michael Killen, and Carten Culmsee (University of Kentucky), Sonu Dhar, Tej K. Pandita, and Mark P. Mattson (Univ. of Kentucky and NIH, National Institute of Aging, Baltimore, MD)	
Regulation of the hTERT Telomerase Catalytic Subunit by the c-<i>Abl</i> tyrosine Kinase	121
S. Kharbanda and V. Kumar (Harvard Medical School, Boston, MA), Sonu Dhar, P. Pandya, C. Chen, P. Majumder, and Z-M. Yuan (HMS), Y. Whang (University of North Carolina), W. Strauss (HMS), Tej K. Pandita, and D. Weaver and D. Kufe (HMS)	
Chronic Activation of Damage-Responsive Functions is Reduced by α-Lipoic Acid in Ataxia Telangiectasia Cells	123
Magtoug Gatei (Queensland Cancer Fund Research Laboratories, Australia), Dganit Shkedy (Tel Aviv University, Israel), Tej K. Pandita, Martin F. Lavin (QCFRL), and Galit Rotman (TAU)	
Meiotic Telomere Distribution and Sertoli-Cell Nuclear Architecture is Altered in <i>Atm</i>- and <i>Atm/p53</i>-Deficient Mice	125
Harry Scherthan and Martin Jerratsch (University of Kaiserslautern, Germany), Sonu Dhar, Y. Alan Wang (Harvard Medical School, Boston, MA), Stephen P. Goff, and Tej K. Pandita	

Characterization of Ataxia Telangiectasia Fibroblasts with Extended Lifespan through Telomerase Expression	127
Lauren D. Wood and Tanya L. Halvorsen (University of California/ San Diego, La Jolla, CA), Sonu Dhar, Joseph A. Baur (University of Texas Southwestern Medical Center, Dallas, TX), Raj K. Pandita (Albert Einstein College of Medicine, Bronx, NY), Woodring E. Wright (UTSMC), M. Prakash Hande, Gloria M. Calaf, Tom K. Hei, Fred Levine (UC/SD), Jerry W. Shay (UTSMC), Jean J.Y. Wang (UC/SC), and Tej K. Pandita	
Adenovirus-Mediated Antisense ATM Gene Transfer Sensitizes Prostate Cancer Cells to Ionizing Radiation	133
Zuoheng Fan and Prabir Chakravarty (Albert Einstein College of Medicine, Bronx, NY), Alan Alfieri (Beth Israel Medical Center, New York, NY), Tej K. Pandita, and Bhadrasain Vikram and Chandan Guha (AECOM)	
Regulation of DNA-Dependent Protein Kinase Activity by Ionizing-Radiation-Activated <i>Abl</i> Kinase is an ATM-dependent Process	135
Sanjeev Shangary (University of Pittsburgh Medical Center, Pittsburgh, PA), Kevin D. Brown and Aaron W. Adamson (Louisiana State University), Scott Edmonson (Boston University, Boston, MA), Bobby Ng (UPMC), Tej K. Pandita, Jack Yalowich (UPMC), Guillermo E. Taccioli (BU), and R. Baskaran (UPMC)	
High Frequency of Hypermethylation at the 14-3-3s Locus to Gene Silencing in Breast Cancer	137
Anne T. Ferguson, Ella Evron, and Christopher Umbricht (Johns Hopkins Oncology Center, Baltimore, MD), Tej K. Pandita, Timothy A. Chan and Heiko Hermeking (JHOC), Jeffrey Marks, Aouk R. Lambers and P. Andrew Futreal (Duke University Medical Center, Durham, NC), Martha R. Stampfer (Berkeley National Laboratory, Berkeley, CA), and Saraswati Sukumar (JHOC)	
Inactivation of 14-3-3s Influences Telomere Behavior and Ionizing-Radiation-Induced Chromosomal Instability	139
Sonu Dhar, Jeremy A. Squire (University of Toronto, Canada), M. Prakash Hande, Raymund J. Wellinger (Université de Sherbrooke, Canada), and Tej K. Pandita	
Telomerase-Associated Protein TEP1 is Not Essential for Telomerase Activity or Telomere-Length Maintenance In Vivo	145
Yie Liu and Bryan E. Snow (Ontario Cancer Institute/Amgen Institute, Toronto, Canada), M. Prakash Hande (Terry Fox	

Laboratory, British Columbia Cancer Research Center, Vancouver, Canada, and Center for Radiological Research, Columbia University), Gabriela Baerlocher (TFL), Valerie Kickhoefer (University of California/Los Angeles School of Medicine), David Yeung (OCII and Amgen, Inc., Thousand Oaks, CA), Drew Wakeham and Annick Itie (OCII), David Siderovski (University of North Carolina/Chapel Hill School of Medicine), Peter Lansdorp (TFL, Canada), Murray O. Robinson (Amgen, Inc.), and Lea Harrington (OCII)

A Few Percent of the Population May Be Genetically Predisposed to Radiation-Induced Cancer	149
Lubomir B. Smilenov, Eric J. Hall, and David J. Brenner	

Differentially Expressed Genes in Asbestos-Induced Tumorigenic Human Bronchial Epithelial Cells	153
Yong L. Zhao, Chang Q. Piao, and Tom K. Hei	

Antisense ATM Gene Therapy: A Strategy to Increase the Radiosensitivity of Human Tumors	157
C. Guha, U. Guha, and S. Tribius (Albert Einstein College of Medicine, Bronx, NY), A. Alfieri (Beth Israel Medical Center, New York, NY), D. Casper and P. Chakravarty (AECOM), W. Mellado, Tej K. Pandita, and B. Vikram (AECOM)	

Identification of a Defined Region with Allelic Loss in Chromosome 11 During Radiation Carcinogenesis	159
Debasish Roy, Gloria M. Calaf, and Tom K. Hei	

Vitamin D Receptor Gene in a High-LET-Radiation- and Estrogen-Treated Breast Cancer Model	163
Debasish Roy, Gloria M. Calaf, and Tom K. Hei	

STUDIES RELATED TO RADIATION THERAPY

Towards Optimal External-Beam Fractionation for Prostate Cancer	169
David J. Brenner	

Adjuvant Radiotherapy for DCIS – Pyrrhic or Low Risk?	173
David J. Brenner, with Peter B. Schiff and Lydia B. Zablotska (Division of Epidemiology, Joseph L. Mailman School of Public Health, Columbia University)	

THE RADIOLOGICAL RESEARCH ACCELERATOR FACILITY

The Radiological Research Accelerator Facility: An NIH-Supported Resource Center	177
Director: David J. Brenner; Manager: Stephen A. Marino; Chief Physicist: Gerhard Randers-Pehrson	

THE RADIATION SAFETY OFFICE

Radiation Safety Office Staff 2000	189
Radiation Safety Office Staff	191
The Radiation Safety Office	193
Director: Salmen Loksen	

ACTIVITIES AND PUBLICATIONS

Professional Activities	211
The Columbia Colloquium and Laboratory Seminars	215
Publications	217
“Metaphase” cover, <i>Molecular Cell Biology</i> 20:11 (June 2000)	221
